

SPACE: BARNES CLOSE – PRIVATE RESIDENCE

CLIENT: Mr & Mrs McCabe

LOCATION: Old, Northamptonshire

SERVICES: Architecture & Interior Design

“Innovative and sustainable design at traditional prices.”

This new build house and contemporary home was designed with due consideration to the issues of site context and history, as it was previously the location of an old farmhouse.

On the edge of the village and adjacent to working farmland, the building utilises a structural steel frame and curved barrel vault roof, reminiscent of Dutch barns.

Douglas Fir cladding wraps the upper floor whilst the ground floor is fully glazed on three sides with a variety of sliding panels to create a strong connection between inside and outside spaces.

Dry construction techniques were used throughout the building allowing for future flexibility in internal arrangements and reducing time and labour costs on site. Materials and services were sourced within a 40 mile radius of the site wherever possible to

minimise embodied energy, and of course all materials were recyclable.

The interior design took its cue from the distinctive architectural approach, in particular the need to create continuity between the internal and external spaces.

Timber flooring runs continuously along the glazed facades to echo the external decking and blur the boundary between the garden and the house. A limited palette of colours and materials were selected throughout to create a contemporary and liveable family home.
